wider precision strip

JINDAL STAINLESS GROUP

Founded by Shri O.P Jindal in 1970, Jindal Stainless is one of the largest stainless steel conglomerates in India and ranks amongst the top 10 stainless steel conglomerates in the world. It's not only the magnitude of our operations that determines our credibility and name, but we remain inspired by our vision for innovation and enriching lives. Jindal Stainless group has an annual crude steel capacity of 1.8 MTPA and the group has an annual turnover of Rs 14,500 crores.

Our growth has been backed by the excellence of our people, value driven business operations, customer centricity and best safety practices in the steel industry and a commitment for social responsibility.

Shri O.P. Jindal

August 7, 1930 - March 31, 2005

Visionary and Founder, O.P. Jindal Group

JINDAL STAINLESS (HISAR) LTD.

The Hisar plant of the group was established in 1975 when Shri O.P Jindal, envisioned a self reliant India for meeting its stainless steel demand. Stainless steel then was no less than a luxury metal and India was completely dependent on imports to fulfil its demand which attracted duties of up to 300%. It was Shri O.P Jindal's vision and his pioneering spirit that led to the establishment of the Hisar plant, India's first stainless steel manufacturing unit.

Since its inception, Jindal Stainless (Hisar) Limited has integrated its operations on a strategy of both, backward and forward integration, starting from melting, casting, hot rolling to cold rolling and other value additions. Today, our Hisar plant is a fully integrated Stainless Steel plant with a capacity of 8,00,000 tpa. It is also the world's largest producer of Stainless Steel strips for razor blades and India's largest producer of coin blanks, serving the needs of India and International mints. Our Specialty product division caters to the high end precision and specialty stainless steel requirements of reputed Indian and International customers. The product range includes Slabs & Blooms, Hot Rolled Coils, Strips, Plates, Coin Blanks, Precision Strips and Cold Rolled Coils.

Going forward, the company plans to continue its focus on development of new value added stainless steel grades, process improvements and customer satisfaction through developing customised products matching their specific requirements. Simultaneously, continuous measures are being undertaken to reduce cost in different production processes.

JINDAL STAINLESS LTD.

Jindal Stainless Limited is one of the largest integrated manufacturers of stainless steel in India with a capacity of 1 million tons per annum. A leader and a name synonymous with 'Enterprise', 'Excellence' and 'Success', company's ethos mirrors most characteristics similar to the metal it produces; akin to stainless steel Jindal Stainless Limited is innovative and versatile in its thought process; strong and unrelenting in its operations. The company is focussing on strengthening Internal Process & Systems and Customer Serviceability. Further, special plans are being made for market development of niche grades and expanding the portfolio of high value products of steel. The state-of-the-art unit of Jindal Stainless is located in the eastern part of India in the state of Odisha. The plant in Odisha also has Ferro Alloy's manufacturing facilities with world class technology and equipments sourced from Siemens VAI, SMS Siemag and Andritz Sundwig and a production capacity of up to 250,000 tons per annum. The complex, equipped with captive power generation facility, is eventually scalable up to 3.2 million tons per annum of stainless steel production.

JINDAL STAINLESS CORPORATE MANAGEMENT SERVICES PVT. LTD. (JSCMS)

Jindal Stainless Corporate Management Services Pvt. Ltd. works as an internal consultant and provides necessary back-end support services to the Jindal Stainless Group Companies. As an advisory company, JSCMS functions closely with Directors, Business Heads and other Functional Heads of Jindal Stainless Group Companies to support them drive seamless flow of business operations. JSCMS acts as a catalyst to achieve business excellence and helps in creating value for Jindal Stainless Group Companies by introducing best practices and regulating processes.

The company focuses on creating value by providing synergy within the group companies, working on a prime repository of global best practices and frameworks with the help of a talented team.

WHITE GOODS

JSL is present in the precision strip applications sector for the white goods industry with high quality steel especially suited to manufacture:

- Commercial Refrigerators
- Washing Machine drum
- Cooktop/cooking range
- Commercial Kitchen (Sinks)

ELECTRONICS

A full range of 300 series and 400 series stainless steels have helped us to remain competitive to our ever-evolving electronics customers making following products:

- Snap dome switches
- Battery parts,
- Disk drives, flash cards and PCMCIA cards.
- Lamp Cap

ARCHITECTURE

Precision Stainless Steel can be used for architecture applications:

- Panels
- Chimney

STRIP WORK-HARDENED THROUGH COLD ROLLING (TEMPER ROLLED)

Strip work-hardened through cold rolling is processed in various ways depending on the intended application. These applications usually exploit the high mechanical resistance typical of work hardened strip to meet the requirements for the following products:

- Small precision metal parts for electrical contacts
- Kitchen objects, paperweights, furnishings, equipment parts for industrial plant in the chemical, food and agricultural sectors
- Soles for safety footwear
- Tools – trowels, spatulas
- Tube clamps
- Spring

POTS & PANS

Precision Stainless Steel is widely used for
Pots and Pans

QUALITY ASSURANCE

ISO 9001:2008 Certification of the plant is a testimony to our commitment towards quality. In addition, the Hisar operations are also certified for AD 2000- Merkblatt W0 and PED 97/23/EC to enable us to be a preferred and certified supplier of Stainless Steel Flat HR & CR products for Pressure vessel, Processing & Allied Industries. ISO 14001: 2004 and OHSAS 18001:2007 systems certification of the plant ensure our commitment towards the environment and for providing a safe workplace for our employees. To ensure quality at every step, the production processes are constantly monitored and controlled so that products are as per customer's requirements. The plant has well equipped laboratories with a battery of modern equipment and well documented procedures for correctness in testing and certification of the products.
